

## Fourth Grade Student Supply List 2021/2022 School Year

Hello Wonderful Hawking Families,

We are so excited to welcome your students that are moving on to the fourth grade here at Hawking. As teachers, it is always an exciting experience to get a new group of dynamic and creative personalities entering our classrooms every year. The fourth grade is a year where students develop a strong sense of independence, social awareness, and work ethic, so look for a huge positive change in your children for the year to come. Here is a list of items that we would like your students to come prepared with in the fourth grade to ensure their success throughout the year.

\*\*\*Multiplication skills are crucial to your child's success in 4th-grade mathematics. If your child has not yet passed their 12's, please practice over the summer so they are prepared to enter the 4th grade.

See you soon!
